## IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

In re application of:	)	Art Unit: 1638
Heard et al.	)	Examiner: D. Kruse
Serial No: 09/533,029	)	
Filed: 3/22/00	)	
For: Disease-Induced Polynucleotides	)	

## AMENDMENT

Assistant Commissioner of Patents and Trademarks  
Patent and Trademark Office  
Washington, D.C. 20231

Dear Sir:

The following correspondence is sent in response to the Office communication mailed March 20, 2001.

## In the Specification

Please amend the specification as follows:

Replace the title with the following: TRANSGENIC PLANTS COMPRISING POLYNUCLEOTIDES ENCODING TRANSCRIPTION FACTORS THAT CONFER DISEASE TOLERANCE.

Replace the abstract of the invention with the following:

N.E.  
The present invention provides a transgenic plant comprising a polynucleotide encoding a transcription factor that may be used to confer disease tolerance to the plant. Further, the invention provides a method for altering the disease tolerance of a plant by altering the expression levels of the polynucleotide encoding the transcription factor, and the polynucleotide and polypeptide sequences themselves.

## In the Claims

Please enter the following amended claims:
